IT Support Specialist

ABOUT ME

Hospitality-facing IT support candidate with Marriott luxury operations experience and an engineering background. Brings user empathy, troubleshooting discipline, and cloud/automation fundamentals while strengthening Active Directory, networking, vSphere, and CompTIA A+ concepts.

EXPERIENCE

Server | Private Dining *Aspen*
St. Regis - Marriott *2025-2026*

- Supported Marriott luxury operations across kitchen, bar, private dining, and overnight service teams in a high-expectation guest environment.
- Worked daily with POS/service systems and understands the impact of downtime, access issues, hardware failures, and delayed IT escalation on guest-facing teams.

Software Engineer *Argentina*
UTN - FRRe *March 2024 - Dec 2024*

- Improved server architecture, automated workflows, and reliability for an internal operations platform supporting hundreds of users.
- Mapped manual processes with non-technical stakeholders, documented constraints, and helped reduce costs 10% while increasing efficiency 50%.

Backend Engineer *Argentina*
Devlights S.R.L *March 2021 - Sep 2021*

- Troubleshot and implemented REST API workflows for customer data collection using Python, Django, Git, and web APIs.

SKILLS
