Carlos Eduardo Ferreyra

Argentina contact@carlosferreyra.me <https://carlosferreyra.me>

About Me

Python/Django Backend Engineer specializing in developing scalable and efficient APIs. Striving for data processing systems and significantly improving their performance.

Profiles

Cloud Skill Boost LinkedIn GitHub Credly

Skills

Tech Stack

Django, Spring Framework, GCP, Terraform, Databricks, Pandas, AWS

Certifications

Associate Cloud Engineer **2024**
Google Coud Platform

Backend Specialization **2024**
Oracle Next Education

Cloud Practitioner Essentials **2024**
AWS

Lakehouse Fundamentals **2024**
Databricks

Projects

Gestion T.U.P **2024**
https://gestiontup-1.onrender.com/

Backend, DevOps, Python, Django

Experience

UTN - FRRe **2024**
Software Engineer Argentina

- Worked in a team of 6+ people building an ED Platform that helped automate tasks, optimize processes, and maximize productivity. This was possible thanks to reverse engineering each manual process and adapting the existing pipeline to technical constraints.
- Designed and implemented a scalable server architecture and automated workflows to support hundreds of users, requiring significant infrastructure improvements and pipeline reengineering.
- Collaborated with the financial department to streamline operational processes, resulting in a 10% reduction in costs and a 50% increase in efficiency.

Devlights S.R.L **2021**
Backend Engineer Argentina

- Collaborated with a team of 4+ interns and mentors to develop a website for an ISP company. This involved front-end development, back-end integration, Google API's integration for map and geo-localization, and data sanitization.
- Implemented a REST-API to automate data collection of the customer
- Gained hands-on experience with Python, Git, Django, Web API's and applied them to a web application.

Education

Universidad Tecnologica Nacional **2015 - 2024**
Engineering Information Systems

Languages

Spanish (Native) **English (Fluent)** **Portuguese (Basic)**
